

数学系分论坛章程

May 27, Afternoon(14:00-18:40), Conference Room 336 of Main building Chair: Zeyu Liao	
14:00 - 14:20	Ye Zhang , Professor,SMBU Inverse Cauchy problems: revisit and two new approaches
14:20 - 14:40	Jiamian Li, SMBU A New Method For Analyzing Context-Free Languages Based On Directed Graphs
14:40 - 15:00	Zhipeng Lu, Senior Lecturer, SMBU Geodesic cover of Fuchsian groups
15:00 – 15:20	Jingyuan Mu, SMBU Construction and recognition of context-free expressions
15:20 - 15:40	Qing Shen, SMBU Inverse Coefficient Problem for a Nonlinear Population Development Model with Integral Features
15:40 – 16:00	You Sun, BIT A concentration preserving discontinuous Galerkin method for nonlinear multi-component chromatography models
16:00 – 16:20	Zeyu Liao, Assistant, SMBU Convergence analysis of inner-iteration preconditioned GMRES method for least squares problems
16:20 - 16:40	Ying-Ao Wang, BIT On a class of linear regression methods
16:40 - 17:00	Tianxiang Tang, SMBU On the complexity of analysis and synthesis problems for parameterised automata
17:00 – 17:20	Tea and Coffee Break
17:20 – 17:40	Qing Zhou, SMBU Application of 3D Gaussian Splatting in 3D reconstruction
17:40 – 18:00	Beiping Duan Assistant, SMBU New artificial tangential motions for parametric finite element approximation of surface evolution
18:00 – 18:20	Jianwei Yang, Associate researcher, BIT On dynamics of the semilinear wave equations outside the unit ball
18: 20- 18: 40	Yan Li, Assistant Professor, BIT Generalized soliton on Q-Fano spherical varieties
18: 40- 19: 00	Yichao Huang, Professor, BIT Moments of Gaussian multiplicative chaos: various aspects
19: 00- 19: 20	Xia Ji, Professor, BIT Numerical methods for the elastic transmission eigenvalue
